Notice of Allowance

This is the Notice of Allowance for application number 10/735,360 Mailbox Post Bracket, filed on 12/12/03. Claims 8, 9 and 13-16 are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claims 1-7 and 10-12 are cancelled.

Please change the dependencies as follows:

In claim 8 after "bracket according to claim" and before "wherein", [7] is deleted and 15 has been added.

In claim 9 after "bracket according to claim" and before "wherein", [7] is deleted and 15 has been added.

In claim 13, after "bracket according to claim" and before "wherein" [12] has been deleted and 16 has been added.

In claim 14, after "bracket according to claim" and before "wherein" [12] has been deleted and 16 has been added.

Please add new claims 15 and 16 below:

15. A bracket for securing a mailbox to an upstanding post,

Art Unit: 3632

the bracket comprising:

a rectangular plate defining a plane, the plate having an upper surface and a lower surface and a pair of long edges having a length and an end of the length and a pair of short edges, the upper surface of the plate being coextensive with and supporting a lower surface of a mailbox;

at least one flange on a long edge of the plate, the flange extending perpendicular to and downwardly from the lower surface of the plane of the plate;

the at least one flange extending along but less than the length of the long edge of the plate, leaving the end of the length free from the at least one flange

at least one fastener securing the flange to the a mailbox;

a continuous and cylindrical sleeve secured in immediate physical contact to a central portion of the lower surface of the plate and extending downwardly therefrom, the sleeve adapted to receive a cylindrical post; and a sleeve fastener for securing the post within the sleeve;

and wherein the plate is provided with a plurality of arcuate lightening holes.

16. A bracket for securing a mailbox to an upstanding post, the bracket comprising:

a rectangular plate having an upper surface and a lower surface and a pair of long edges and a pair of short edges, the upper surface of the plate being dimensioned to be generally coextensive with and adapted to support a lower surface of the a mailbox;

a plurality of lightening holes formed in the plate;

a flange extending along each long edge of the plate generally perpendicular to and downwardly from the lower surface of the plate, the flange having a length shorter than that of the plate, wherein the plate is free of the flange at each end thereof;

at least one fastener for securing the flanges to corresponding flanges on the mailbox;

a generally cylindrical, one-piece sleeve in immediate physical contact with a central portion of the lower surface of the plate and extending downwardly therefrom, the sleeve adapted to receive a generally cylindrical post; and a sleeve fastener for securing the a post within the sleeve.

Authorization for this examiner's amendment was given in a telephone interview with Mark Perdue on 10/10/06.
